WHAT IS GITHUB FOR

is a collaborative development platform that hosts projects in the cloud using the version control system .

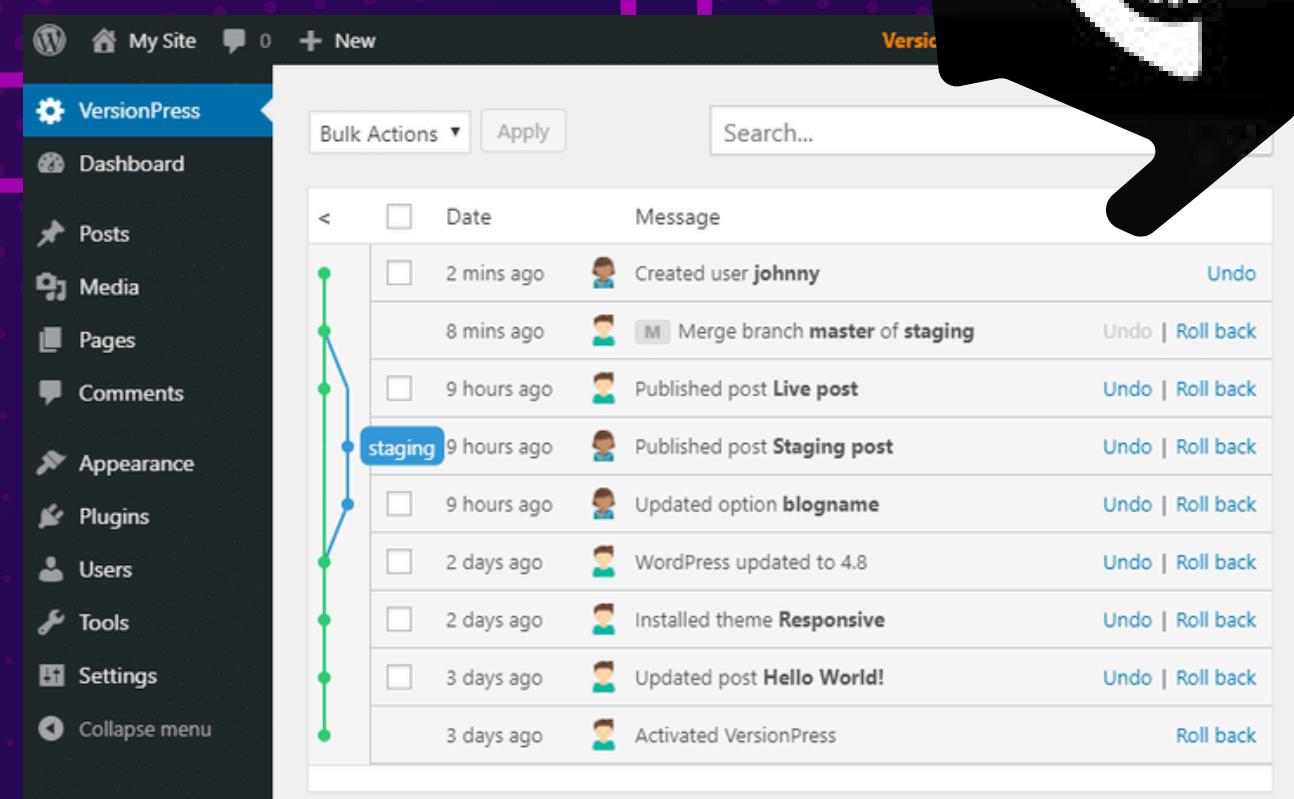

```
Jgacosta@JACOSTA /C/wamp/www/chromeApp (master)
$ git push -u origin master
Username for 'https://github.com': jonathanjgacosta
Password for 'https://jonathanjgacosta@github.com':
Counting objects: 7, done.
Delta compression using up to 4 threads.
Compressing objects: 100% (7/7), done.
Writing objects: 100% (7/7), 2.07 KiB / 0 bytes/s, done.
Total 7 (delta 0), reused 0 (delta 0)
To https://github.com/jonathanjgacosta/Calculadora.git
 * [new branch] master -> master
Branch master set up to track remote branch master from origin.
Jgacosta@JACOSTA /C/wamp/www/chromeApp (master)

HOW GITHUB WORKS

GitHub is a cloud-based service that hosts a version control system (VCS) called Git.

The screenshot shows a WordPress dashboard with the VersionPress plugin active. The sidebar menu includes options like Posts, Media, Pages, Comments, Appearance, Plugins, Users, Tools, and Settings. The main content area displays a timeline of recent actions:

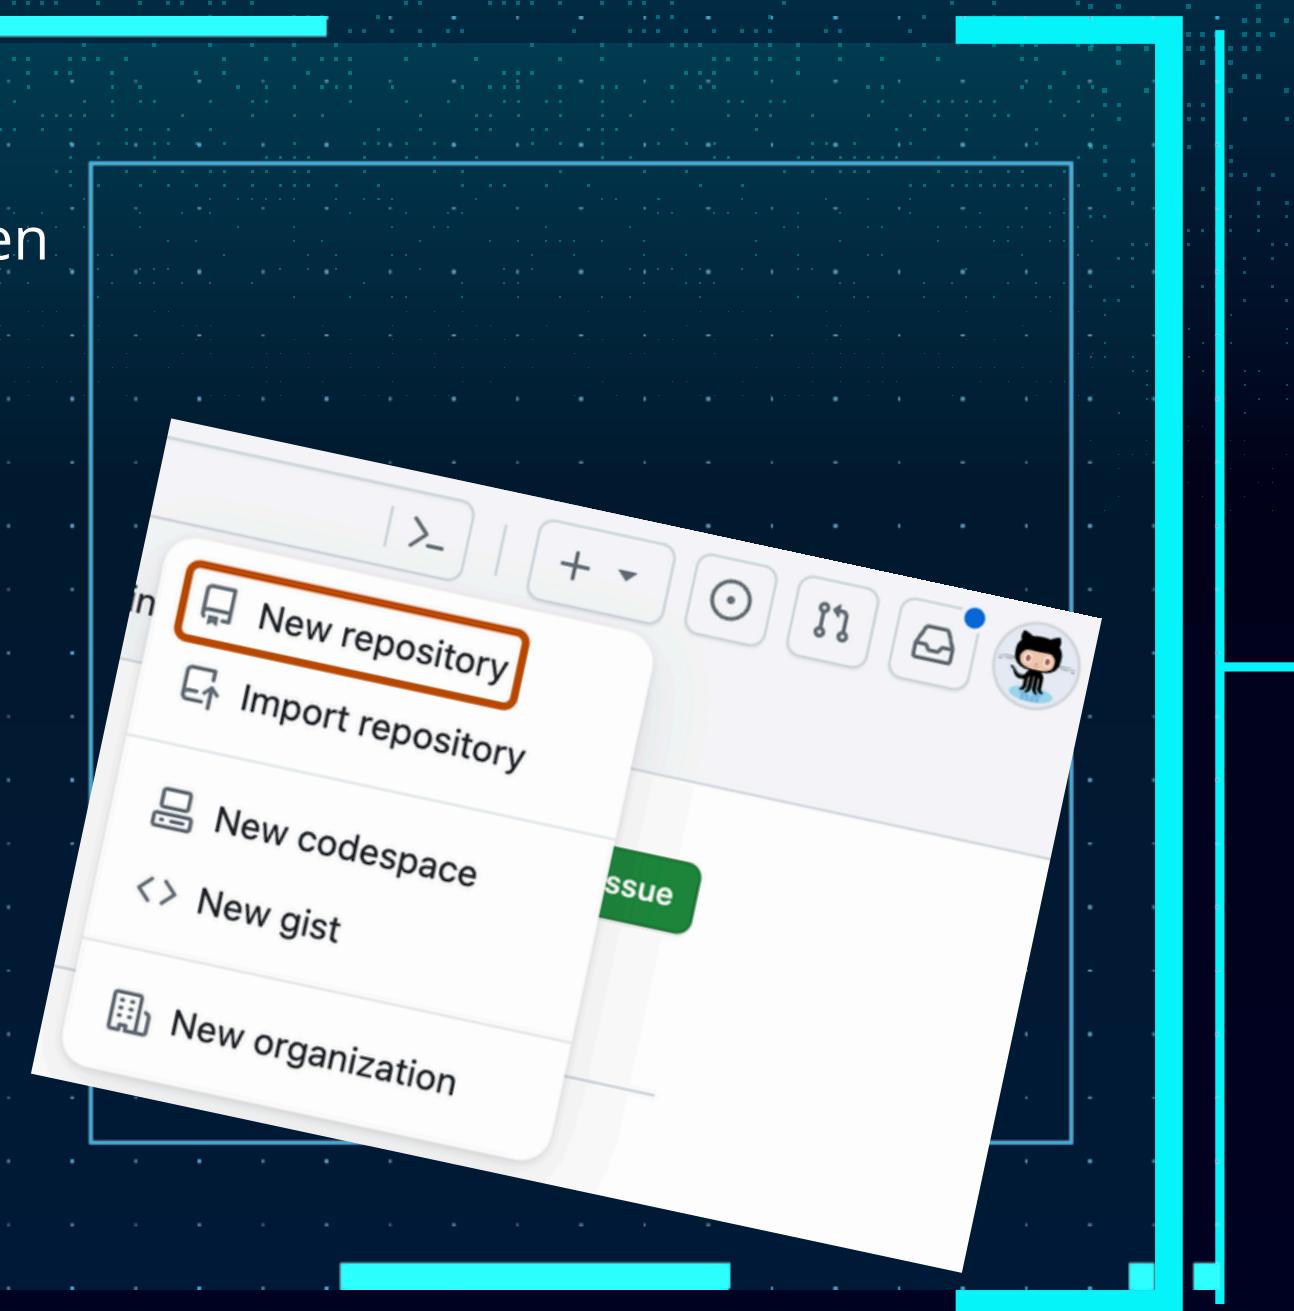

Date	Message	Actions
2 mins ago	Created user johnny	Undo
8 mins ago	M Merge branch master of staging	Undo Roll back
9 hours ago	Published post Live post	Undo Roll back
9 hours ago	Published post Staging post	Undo Roll back
9 hours ago	Updated option blogname	Undo Roll back
2 days ago	WordPress updated to 4.8	Undo Roll back
2 days ago	Installed theme Responsive	Undo Roll back
3 days ago	Updated post Hello World!	Undo Roll back
3 days ago	Activated VersionPress	Roll back

HOW TO CREATE A REPOSITORY

1. In the upper-right corner of any page, select , then click New repository.
2. Type a short, memorable name for your repository.
3. Choose a repository visibility.
4. Select Initialize this repository with a README.
5. Click Create repository

6

HOW TO UPLOAD A FILE IN YOUR REPOSITORY

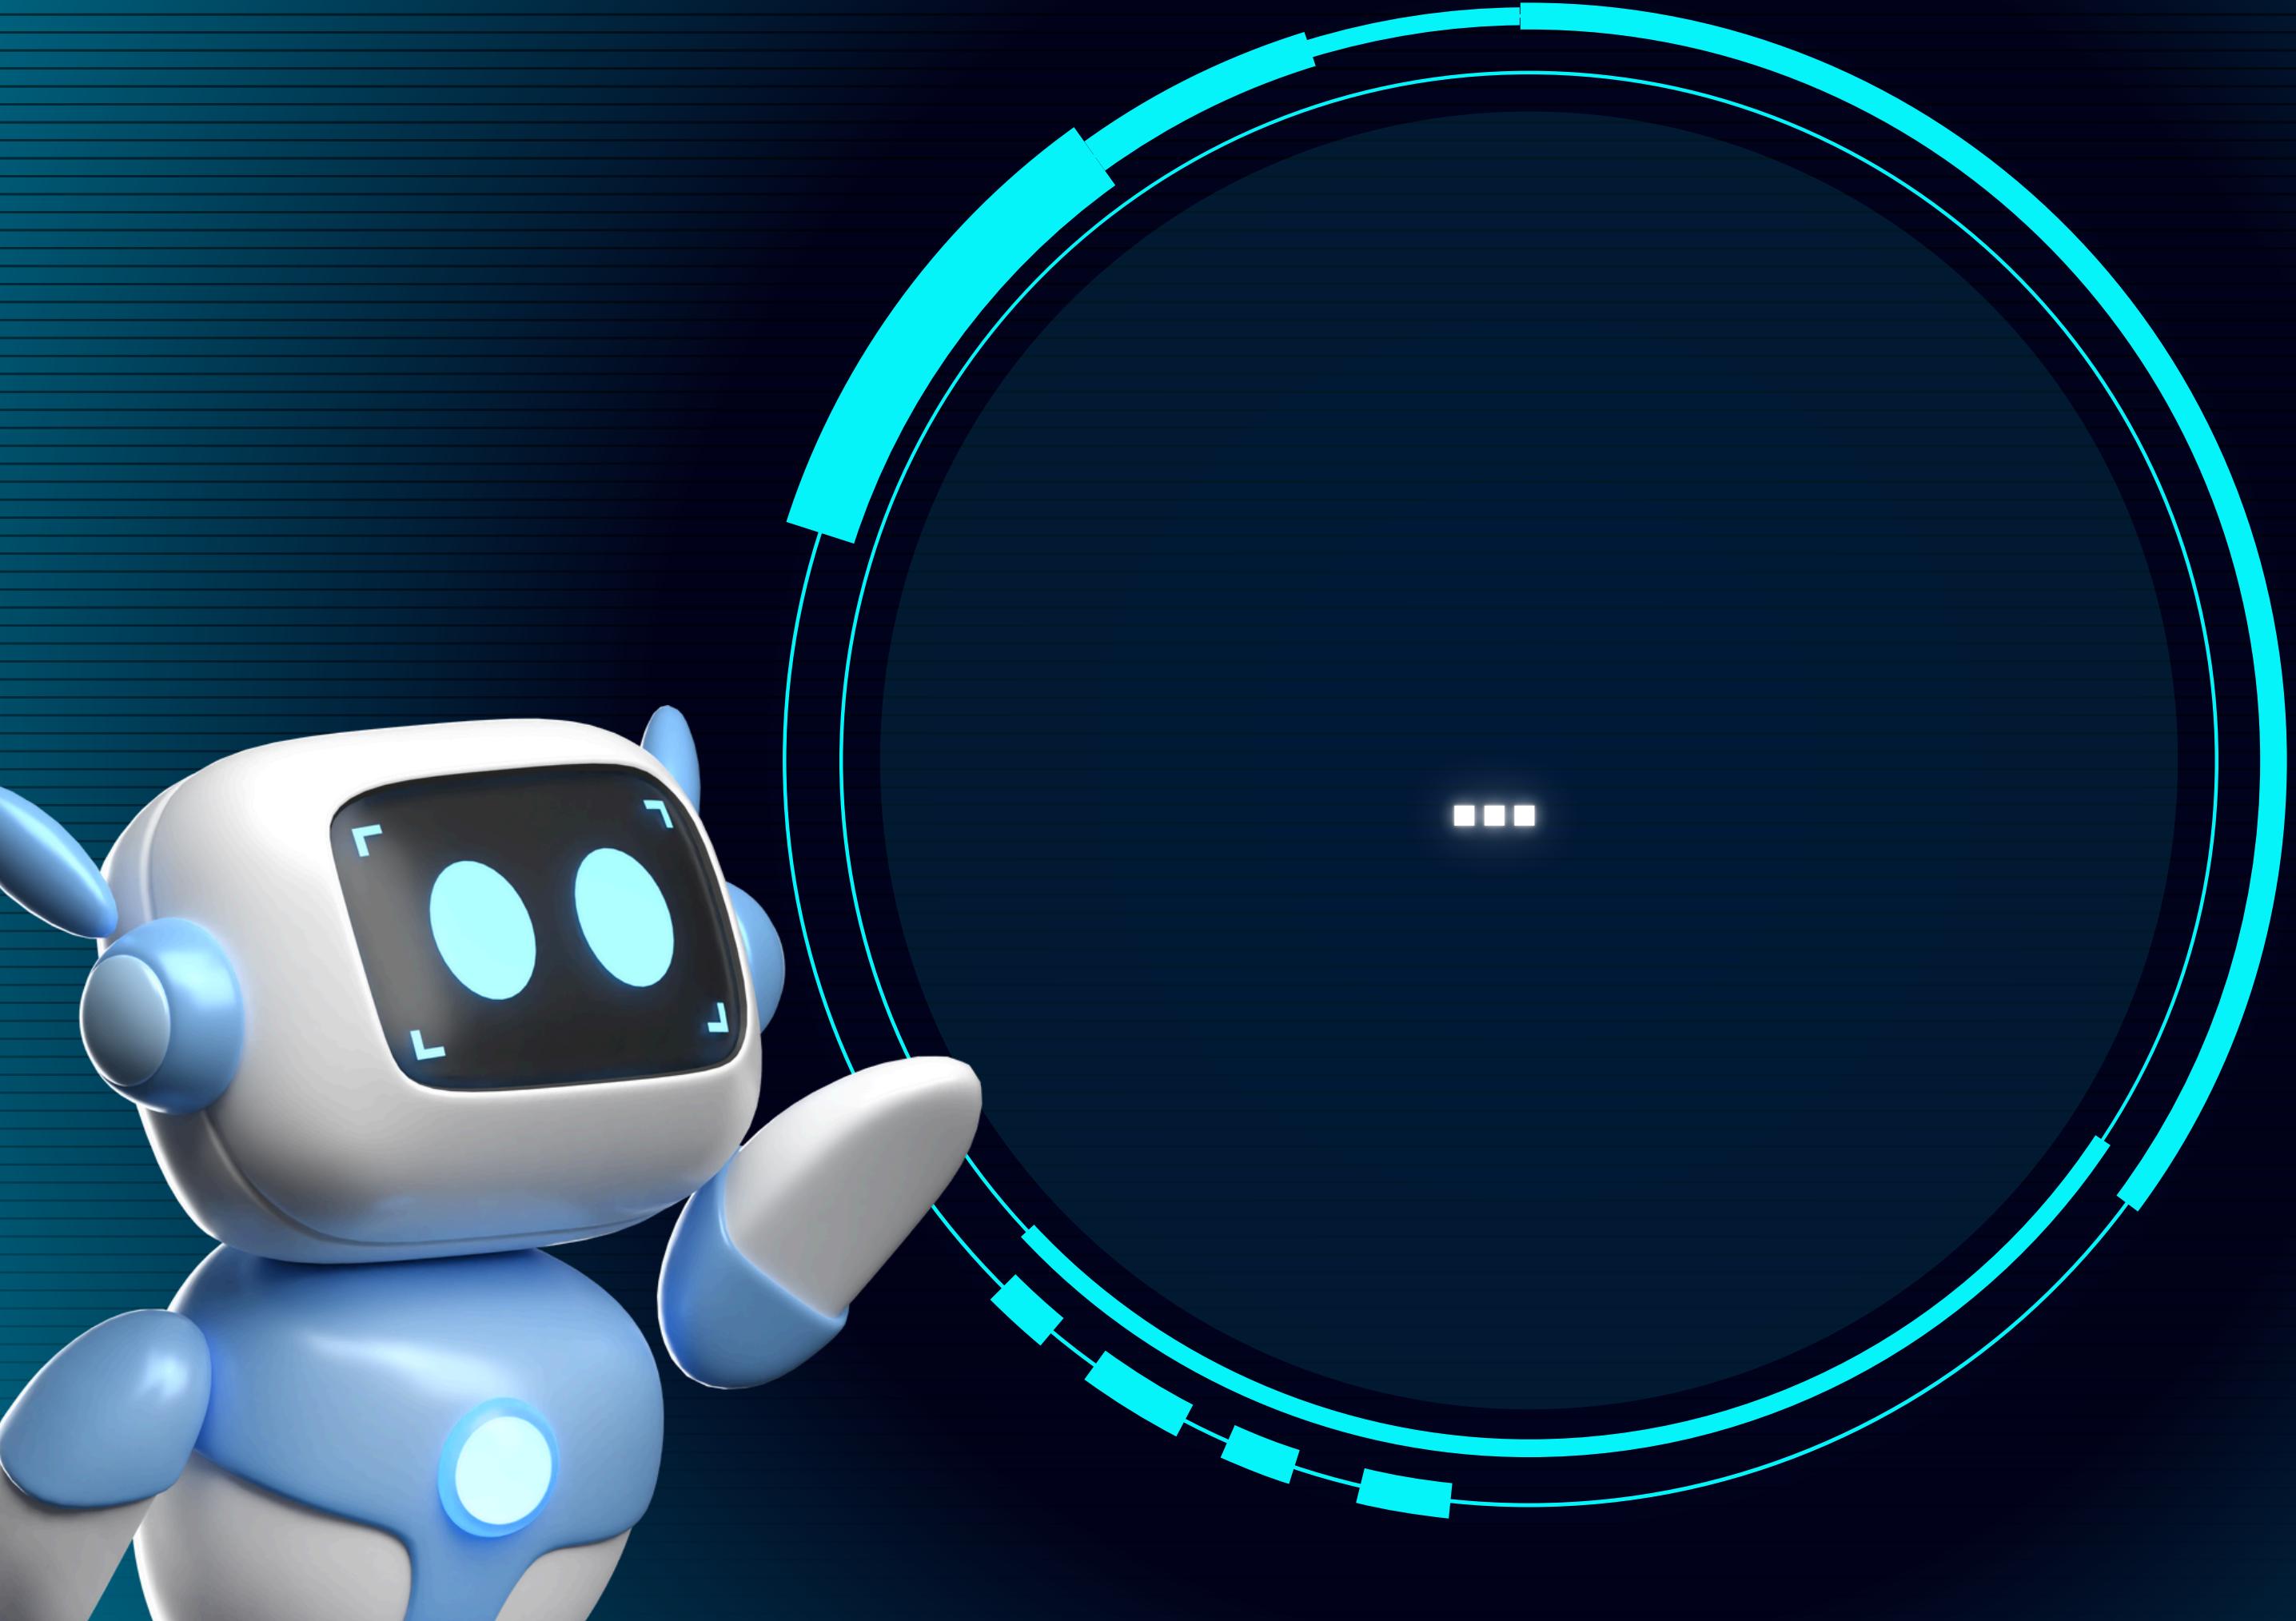

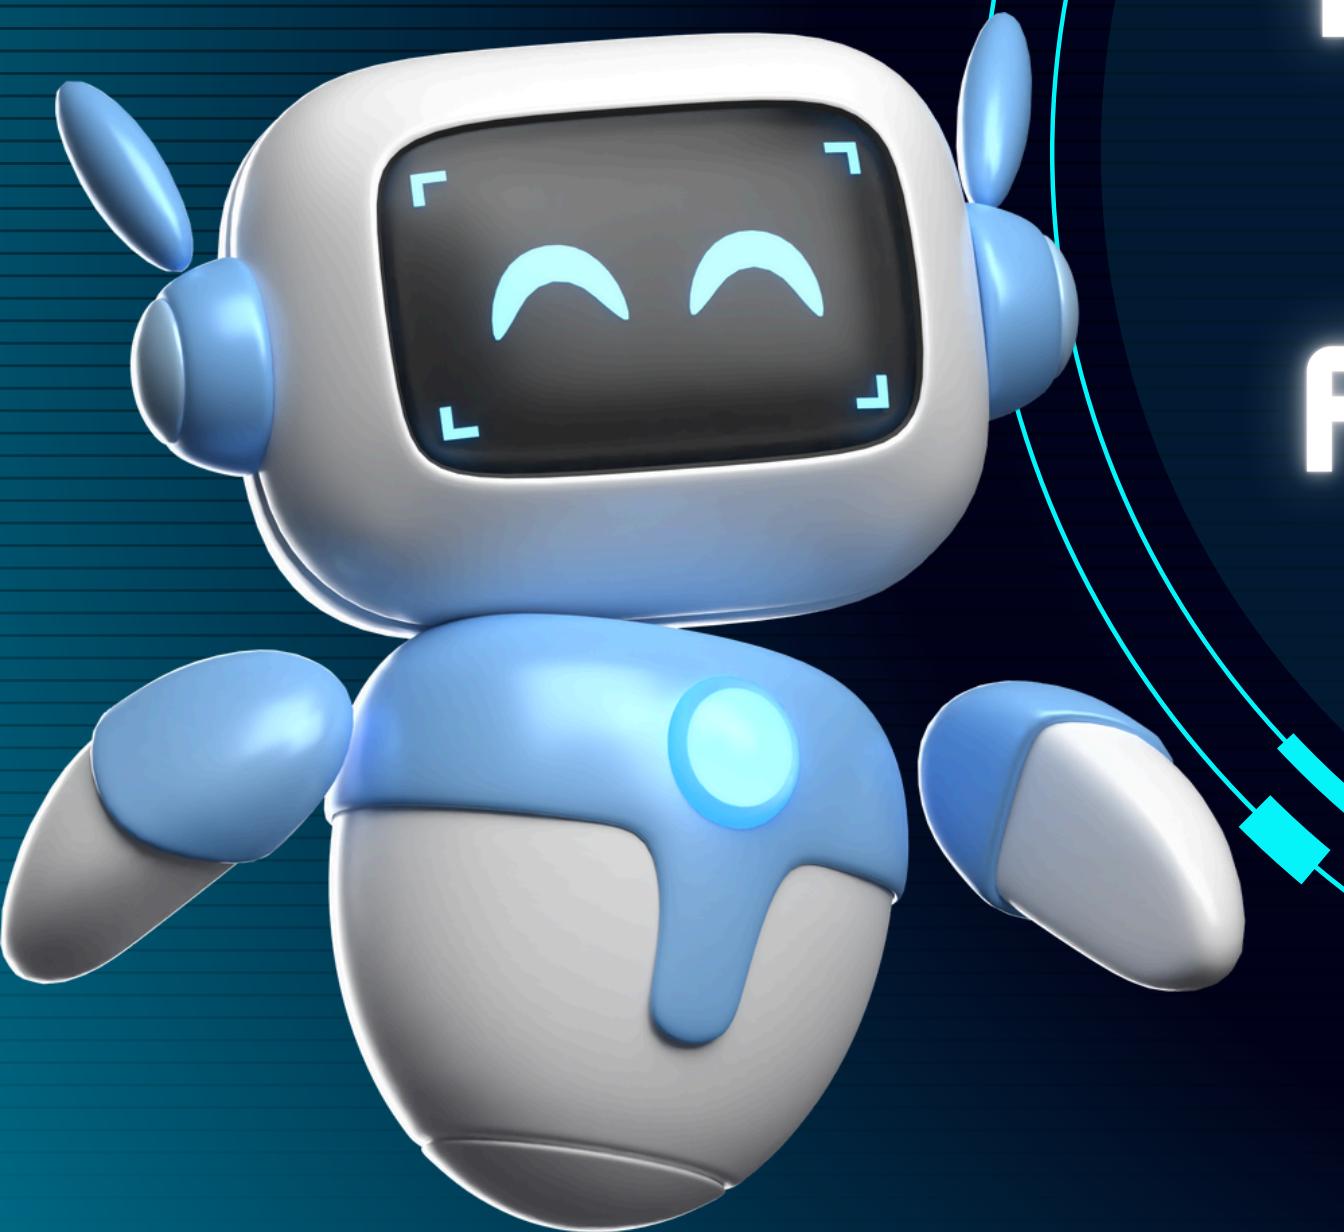

navigate to the main page of the repository. Above the list of files, select the Add file dropdown menu and click Upload files.

The screenshot shows a GitHub repository interface. At the top, there are navigation links for 'main' (selected), '44 Branches', and '1 Tags'. To the right is a search bar labeled 'Go to file' and an 'Add file' dropdown menu. The 'Add file' menu is open, displaying two options: '+ Create new file' and 'Upload files', with 'Upload files' highlighted by a red border. Below the menu, a list of recent commits is visible. The first commit is from 'docs-bot' merging pull request #30375 from 'github/repo-sync'. The second commit is a file named '.devcontainer' with a timestamp of '2 months ago'.
